

## SafetyFirst's Learning Management System (LMS)

### Summary:

SafetyFirst's Learning Management System (LMS) assigns focused training modules to individual drivers based on their risk-taking behaviors; such as weaving in traffic, excessive speeding or running stop signs. These can be reported using our Motorist Observation Reports (MORs), TeleMatics Alerts (TMAs), or Motor Vehicle Records (MVRs) from enforcement violations.

### Course List:

- Tailgating <sup>1</sup>
- Aggressive Driving <sup>1</sup>
- Improper Lane Change <sup>1</sup>
- Distracted Driving <sup>1</sup>  
(Cell Phone/Text)
- Honoring the Right of Way <sup>1</sup>
- Drug/Alcohol Use

GPS monitored fleets)

<sup>1</sup> Available in both English and Spanish

# Driver Training

## Online Training Modules can be assigned as follows:

- On-Demand from the Hotline Reports portal.
- Supervisor assigned courses to individual driver via email.
- Supervisor assigned courses to the entire fleet of drivers/employees (multiple/group assignment) via email.
- Print out notifications to drivers who don't have an email address.
- Automatically enroll drivers from eDriverFile based on:
  - MVR showing recent violation activity.
  - Telematics alerts
  - Motorist observation reports
  - Red light camera violation
  - Crashes
  - Quarterly curriculum of multiple courses (customizable).

## Additional Features

- Reminder notices and management reports showing assignment, completion, score, and time dedicated to training materials.
- Driver's ability to access training materials is available on iphone, android, ipad, etc.
- Driver receives certificate of completion after passing the assigned course.
