PRAESIDIUM'S SCIENTIFIC METHODOLOGY

Using current research and root cause analysis, Praesidium developed its own abuse risk management model, The Praesidium Safety Equation.[®] Root-cause analysis of several thousand incidents of abuse across industries demonstrated that risks fell into eight organizational operations: Policies, Screening and Selection, Training, Monitoring and Supervision, Internal Feedback Systems, Consumer Participation, Responding, and Administrative Practices. By implementing best practices in each of these operations, Praesidium determined that risks could be reduced or eliminated.

CRISIS MANAGEMENT TOOLKIT

Whether your organization is currently facing a crisis or proactively refining your response protocols, Praesidium's Crisis Response Toolkit is designed to help your organization navigate difficult decisions and ensure the organizational response unfolds smoothly, strategically, and integrates a survivor-focus. This toolkit highlights various decision points, provides samples to get you started, and helps your organization build a crisis response team, ensure safety, follow reporting requirements, gather initial information, communicate with a range of stakeholders, provide resources, and pivot to prevention.

PRAESIDIUM HELPLINE

The Praesidium Helpline gives your organizational leadership team a confidential mechanism to discuss concerns or allegations involving sexual abuse and receive support to navigate next steps. Available seven days a week, Praesidium's team can provide immediate recommendations to ensure: the safety of all parties, external reporting, internal reporting; mid-term recommendations to course correct; and long-term recommendations to support a culture of safety. *Be sure to use the dedicated helpline number outlined in the GAIG materials. Information discussed during the call will **not** be shared with your insurance carrier.*
